

## Using the Revert Tool

If you make multiple edits to a grid accidentally and want to return the grid to its last saved state, use the Revert Tool.

Step	Action	Notes
1	Click <b>Edit</b> from the Menu Bar.	
2	Select <b>Revert Forecast...</b>	
3	<p>Select the element(s) you wish to revert in the <b>Revert Forecast</b> dialog (example image below).</p> 	
4	<p>Click <b>Revert Forecast</b>.</p> <p><b>Result:</b> The element(s) are reverted to their last saved state.</p>	<p>If you click Revert Forecast without previously saving your grids, the grids in the Grid Manager disappear completely. Make sure you have previously saved your grids to properly revert your forecast grids.</p>
